

AGGIORNAMENTO 2026

La primavera sta arrivando...

PISCINE FUORI TERRA

BLULAB

QUALITÀ SCANDINAVA

Il legno proveniente dalle foreste scandinave ha proprietà uniche; il clima rigido crea anelli di crescita nei pini notevolmente più densi che altrove. Questo rende il legno molto più forte e duraturo tanto che, anche se non trattato con l'impregnante resta resistente agli agenti atmosferici

Il legno, prima di diventare il rivestimento per la nostra piscina, subisce più lavorazioni; la stagionatura, l'essiccazione e l'impregnatura.
